## ABOUT US

Do you know that one of the most splendid valleys in Poland – Dolina Noteci in Wielkopolska Province – has been awarded in the competition ‘Seven new wonders of Poland’ in category ‘Nature’? Amid beautiful meadows, woods and oxbow lakes, one may find Dolina Noteci Pet Food Production Plant working in harmony with nature and the environment. We benefit from the local goods which are grown nearby. Therefore we use Polish vegetables and fruit carefully nurtured and harvested by the farmers from Dolina Noteci. Due to cooperation with local farmers, whose fields border with the production plant, we are certain that only ingredients of the highest quality are provided to our pet food. Carefully selected meat products from the approved suppliers and fresh Polish vegetables develop products of the super premium quality, which are recognized and esteemed also on foreign markets. Having in mind primarily the satisfaction of pets, we constantly improve the recipes and develop new kinds and flavors of our pet food. We are highly pleased that more and more customers choose to buy them. We respect those who cherish and love animals – we also appreciate their presence in our lives.

Therefore Dolina Noteci team is also our pet – dog the President. He cares, together with us, to maintain the best quality of our pet food. The President is the first one who tastes the newest pet food varieties and certifies their palatability with the print of his paw. Because animals are close to us and we want to put all the best into their bowls, we are able to provide you with the highest quality product with great taste and – what is important – made in Poland. Many customers have already appreciated Dolina Noteci brand – find out why! Dolina Noteci means the taste of the heights for your pet!

## PREMIUM

### Why choose Dolina Noteci PREMIUM?

- The foods are perfectly balanced in terms of content of minerals and vitamins, according to the latest feeding standards and proper nutrition principles.
- They guarantee appropriate mineralization of bones and, teeth as well as correct metabolic processes.
- They have proper proportions of mineral ingredients (calcium-phosphorus ratio is 1.28:1) which ensures correct growth of the organism.
- The protein digestibility reaches 90–95% owing to properly selected raw materials.
- Total fat content in the foods does not exceed 10%, therefore, they are recommended for all pets.
- Biologically active compounds in the foods, which sources are basil, brown rice, carrots and linseed oil, guarantee correct metabolism. Combined, these substances improve absorption of remaining nutrients and enhance the food flavour.
- Ethereal oils contained in basil improve the food flavour and have an aseptic properties in the oral cavity.
- Brown rice is a valuable source of dietary fibre, particularly of the water-soluble fraction which, in combination with carrots, improves water absorption of feces.
- In addition, linseed oil, a source of n-3 and n-6 fatty acids, vitamin E and a number of anti-inflammatory biological compounds, provide biologically active phytosterols which control the lipids metabolism and improve functioning of the digestive tract.
- The method of production and carefully selected raw materials make this pet food easily digestible, with high digestibility coefficients of all nutrients, and a perfect fit for nutritional requirements.

### A complete pet food for adult dogs of all breeds rich in veal with green peas

can 400 g, 800 g

## PREMIUM Pure

11

### Why choose Dolina Noteci PREMIUM Pure?

- In order to meet the needs of demanding dogs' tastes we have broadened the Dolina Noteci Premium line with PURE foods composition, which is based on a single source of animal protein necessary for maintenance of healthy and strong bones. If a dog shows symptoms of food allergy, this pet food should be selected, which guarantees a lack of presence of the protein causing allergy.
- Pet food based on a single protein is a part of dietary recommendations of an eliminative diet and a great alternative for those who, want to make sure whether the symptoms after eating a given protein are symptoms of food allergy.
- Total fat content in Dolina Noteci PURE food does not exceed 10% and thanks to that it is recommended for feeding all animals, while the composition of Dolina Noteci PURE food remains unchanged – it guarantees continuous supply of necessary nutrients ensuring correct development of a dog.
- Ingredients used during the production of the food are rich in vitamins soluble in fats which guarantees their sufficient amount in the product and decreases necessity of supplementing food with synthetic vitamins.

### Why choose Dolina Noteci PREMIUM Junior?

- These products are developed according to the latest feeding standards and nutritional recommendations for puppies and young dogs of medium and large breeds.
- Their composition ensures proper mineralization of bones and teeth, as well as guarantees appropriate growth of the organism through stimulation of all metabolic processes.
- Addition of yeast containing beta glucans is a perfect complement of the puppy diet with valuable prebiotic ingredients which guarantee right development and stimulation of digestion processes in the digestive tract, as well as improve the defensive functions of a young organism by stimulating the immunity cells.
- The EPA and DHA acids contained in the salmon fat determine proper development of the nervous system in young organisms, reduce inflammatory processes and stimulate muscular system.
- Linseed oil, a source of n-3 and n-6 fatty acids, vitamin E and a number of anti-inflammatory biological compounds, improves the growth of skin cells ensuring correct appearance of the dog coat.
- Addition of carrots, amaranth and Mojave yucca improves, by means of biologically active compounds and water-soluble dietary fibre, the functioning of digestive tract and enhances absorption of remaining nutrients.
- Thanks to its ability to regulate the number of putrefactive bacteria in the digestive tract, Mojave yucca enhances the digestive functions.
- The method of production and carefully selected raw materials make this pet food easily digestible, with high digestibility coefficients of all nutrients, and a perfect fit for nutritional requirements.

PREMIUM  
DLA MAŁYCH RAS

## **Why choose Dolina Noteci PREMIUM for adult dogs of small breeds?**

- The food composition is precisely adapted to the requirements of adult dogs and complies with the nutritional recommendations of veterinarians.
- This pet food is a source of complete protein necessary to maintain healthy and strong bones.
- It contains essential fatty acids responsible for the appropriate metabolism.
- Addition of salmon oil improves the functioning of skin and appearance of coat.
- Plant raw materials included in food ensure correct digestive processes and consequently regulate defecation.
- The foods are rich in:
  - vegetables which improve the absorption of nutrients and regulate the functioning of digestive tract,
  - Mojave yucca which enhances the digestive functions and reinforces the immune system.
- The composition of Dolina Noteci Premium pet food is constant which guarantees the permanent supply of necessary nutrients for appropriate growth of a dog.
- Daily portion of the food recommended by the producer guarantees proper weight of a dog without risk of obesity or underweight.

### A complete pet food for adult dogs of small breeds with pheasant, pumpkin and pasta

*pouch 100 g, can 185 g*

**Composition:** beef 30% (meat, lungs, hearts, tripes), pork 24% (meat, kidneys, liver, oesophagus), chicken 15% (meat, liver, gizzards), broth, pheasant 6% (carcass), eggs 5%, pumpkin 4%, pasta 4%, minerals, Plantago psyllium seeds 0.3%, salmon oil 0.2%, Mojave yucca 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 6.5%, crude ash – 2%, crude fibre – 0.6%, moisture – 78%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

### A complete pet food for adult dogs of small breeds with rabbit, green beans and brown rice

*pouch 100 g, can 185 g*

**Composition:** beef 30% (meat, lungs, hearts, gizzards), pork 24% (meat, kidneys, liver, gullets), chicken 15% (meat, liver, gizzards), broth, rabbit 6% (liver), eggs 5%, green beans 4%, natural brown rice 4%, minerals, Plantago psyllium seeds 0.3%, salmon oil 0.2%, Mojave yucca 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 6.5%, crude ash – 2%, crude fibre – 0.6%, moisture – 78%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

A complete pet food for adult dogs of small breeds with veal, tomatoes and pasta

pouch 100 g, can 185 g

**Composition:** beef 30% (meat, lungs, hearts, tripes), pork 24% (meat, kidneys, gullets, liver), chicken 15% (meat, gizzards, liver), broth, veal 6% (liver), egg 5%, tomato 4%, pasta 4%, minerals, Plantago psyllium seeds 0.3%, salmon oil 0.2%, Mojave yucca 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 6.5%, crude ash – 2%, crude fibre – 0.6%, moisture – 78%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

A complete pet food for adult dogs of small breeds with goose, potatoes and apple

pouch 100 g, can 185 g

**Composition:** beef 30% (meat, lungs, hearts, tripes), pork 24% (meat, kidneys, liver, gullets), chicken 15% (meat, liver, gizzards), broth, goose 6% (hearts), eggs 5%, potato 4%, apple 4%, minerals, Plantago psyllium seeds 0.3%, salmon oil 0.2%, Mojave yucca 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 6.5%, crude ash – 2%, crude fibre – 0.6%, moisture – 78%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

PREMIUM

*junior*

## Why choose Dolina Noteci PREMIUM for dogs of small breeds Junior?

- The food composition is adapted to the requirements of young dogs and complies with the nutritional recommendations of veterinarians.
- The foods are a source of complete protein necessary at all stages of dogs' development and growth.
- They contain essential fatty acids responsible for appropriate metabolism.
- Addition of salmon oil improves the functioning of skin and appearance of coat.
- Plant raw materials in the food ensure correct digestive processes and consequently regulate defecation.
- The foods are rich in:
  - vegetables which improve absorption of nutrients and regulate the functioning of digestive tract,
  - Mojave yucca which enhances the digestive functions and reinforces the immune system,
  - methylsulfonylmethane (MSM) which has anti-inflammatory properties and stimulates defensive mechanisms of the organism.
- The composition of Dolina Noteci Premium pet food is constant which guarantees a permanent supply of necessary nutrients for appropriate growth of a dog.
- Daily portion of the food recommended by the producer guarantees proper weight of a dog, commensurate with the breed.

### A complete pet food for puppies and young dogs of small breeds rich in rabbit liver with deer tongues

pouch 100 g, can 185 g

**Composition:** beef 30% (meat, lungs, hearts, tripes), rabbit 16% (liver), broth, pork 10% (meat, lungs, hearts), turkey 7% (skins), deer 6% (tongues), chicken 6% (gizzards), eggs 4%, potatoes 2.5%, salmon oil 1%, minerals, dried brewer's yeast 0.45% (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%, linseed oil 0.2%, MSM (methyl sulphonyl methane) 0.05%, Mojave yucca 0.03%.

**Analytical constituents:** crude protein – 12%, crude fat – 7.5%, crude ash – 2%, crude fibre – 1%, moisture – 76%, calcium – 0.3%, phosphorus – 0.2%.

**Additives: nutritional additives/kg:** Vitamin D3 – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

### A complete pet food for puppies and young dogs of small breeds rich in chicken gizzards with veal liver

pouch 100 g, can 185 g

**Composition:** beef 30% (meat, heart, lungs, liver, tripes), chicken 20% (gizzards 16%, liver), broth, pork 11% (meat, lungs, hearts), veal 7% (liver), turkey 7% (skin), eggs 4%, potatoes 2.5%, salmon oil 1%, minerals, dried brewer's yeast 0.45% (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%, linseed oil 0.2%, MSM (methyl sulphonyl methane) 0.05%, Mojave yucca 0.03%.

**Analytical constituents:** crude protein – 12%, crude fat – 7.5%, crude ash – 2%, crude fibre – 1%, moisture – 76%, calcium – 0.3%, phosphorus – 0.2%.

**Additives: nutritional additives/kg:** Vitamin D3 – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

A complete pet food for puppies and young dogs of small breeds rich in lamb stomachs

pouch 100 g, can 185 g

**Composition:** beef 30% (meat, lungs, hearts, tripes), lamb 16% (stomachs), broth, chicken 12% (meat, gizzards, liver), pork 10% (meat, lungs, hearts), turkey 7% (skins), eggs 4%, potatoes 2.5%, salmon oil 1%, minerals, dried brewer's yeast 0.45% (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%, linseed oil 0.2%, MSM (methyl sulphonyl methane) 0.05%, Mojave yucca 0.03%.

**Analytical constituents:** crude protein – 12%, crude fat – 7.5%, crude ash – 2%, crude fibre – 1%, moisture – 76%, calcium – 0.3%, phosphorus – 0.2%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

A complete pet food for puppies and young dogs of small breeds rich in turkey hearts with goose liver

pouch 100 g, can 185 g

**Composition:** turkey 30% (hearts 16%, meat, liver, skin), beef 22% (meat, heart, lungs, tripes, liver), broth, pork 11% (meat, lungs), goose 6% (liver), chicken 6% (gizzards), eggs 4%, potatoes 2.5%, salmon oil 1%, minerals, dried brewer's yeast 0.45% (containing the prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%, linseed oil 0.2%, MSM (methyl sulphonyl methane) 0.05%, Mojave yucca 0.03%.

**Analytical constituents:** crude protein – 12%, crude fat – 7.5%, crude ash – 2%, crude fibre – 1%, moisture – 76%, calcium – 0.3%, phosphorus – 0.2%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

PREMIUM

STARTER

## Why choose Dolina Noteci PREMIUM Starter?

- Compared with other pet foods Dolina Noteci STARTER contains more highly digestible protein and energetic constituents which are very important for lactating bitches and puppies during the period of intensive growth (up to 2 months old).
- Quantities of minerals and vitamins have been precisely selected in order to meet specific needs of organisms during the phase of intensive demand for vitamins and minerals, according to modern standards and dietary recommendations.
- Products of animal origin provide acids from the n-3 and n-6 groups, while salmon oil is a valuable source of EPA and DHA acids, which ensures appropriate development of the nervous system and regulates inflammatory processes.
- Linseed oil in the pet food has a positive influence on maintaining correct proportions between acids, which contributes to maintaining correct functions of the whole organism and improves functioning of the gastrointestinal tract.
- Yeasts, beta-glucans and mannan-oligosaccharides ensure correctness of the digestive processes. They are also recognized as digestive factors stimulating the immune system of both young and adult organisms.

## A complete pet food for feeding mothers during lactation and puppies (from separation up to 2 months old)

can 185 g

**Composition:** turkey 29% (meat 15%, hearts, gizzards, skins), pork 21% (meat, liver, hearts), eggs 5%, whey protein 2%, salmon oil 2%, linseed oil 0.8%, minerals, dried brewer's yeast 0.55% (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%.

**Analytical constituents:** crude protein – 11%, crude fat – 7%, crude ash – 2%, crude fibre – 0.8%, moisture – 79%, calcium – 0.3%, phosphorus – 0.28%.

**Additives: nutritional additives/kg:** Vitamin D3 – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

# Dolina<sup>®</sup> Noteci

## SUPERFOOD

### Why Dolina Noteci Superfood pet food deserves to be called Superfood?

- The products included in this line are based on high-value, raw materials, rich in substances with a beneficial effect on dogs' health and condition. Thanks to the content of raw materials of animal origin, this pet food perfectly responds to the nutritional needs of adult dogs. The Superfood range contains no cereals, preservatives, artificial flavours, dyes or palatability enhancers. The recipes are based on unique meat species: roe deer, deer, duck, kangaroo, goose, lamb, beef and veal, making up 80% of the composition. This pet food is supplemented with valuable natural additives, such as: seaweed, New Zealand green-lipped mussel, brewer's yeast, linseed, Plantago seed and Mojave yucca.

### Natural functional additives:

- **SEAWEEDS** – absorb all micro and macroelements present in water, for example, iodine responsible for proper metabolism and iron which ensures appropriate blood balance. They also contain antioxidant beta-carotene and chlorophyll, which purify and eliminate the effects of carcinogens, as well as fatty acids – mainly n-3 acids lowering the blood triglyceride level. All these ingredients are perfectly assimilated.
- **NEW ZEALAND GREEN-LIPPED MUSSEL** – is a source of: glucosaminoglycans helping regenerate joints and silicon in the form of silicic acid beneficially affecting the skin.
- **FLEX SEED** – common flax seeds are a source of lignans which moisturize the skin and regulate lipid and carbohydrate metabolism, as well as pectin and fatty acids, supporting proper work of digestive system, especially linolenic acid which alleviates inflammatory conditions.
- **PLANTAGO SEED** – regulate metabolism, prevent constipations and support proliferation of beneficial intestinal microflora, thus reinforcing natural immunity, as well as detoxify the body.

- **MOJAVE YUCCA** – saponins contained in it ensure proper functioning of the digestive tract – they stimulate secretion of digestive juices, regulate lipid-carbohydrate metabolism and have detoxifying effect, while antioxidants protect against cancers.
- **BREWERS YEAST** – a source of prebiotics (mannan-oligosaccharides and  $\beta$ -glucans) stimulating the proliferation of good bacteria present in the intestines and supporting immunity, as well as B vitamins, ensuring proper functioning of the nervous system and providing good skin condition.
- **GLUCOSAMINE** – a substance naturally present in cartilage and synovial fluid. It retains water, increasing the elasticity of the connective tissue present in the joints. It also reduces pain in osteoarthritis.
- **CHONDROITIN SULPHATE** – an organic compound which is a natural component of cartilage tissue. It improves cushioning of joints and relieves pain in degenerative diseases of the locomotive system.

### Selected meat species:

- **QUAIL** – exquisite, delicious meat. Well-vascularized red fibers predominate over white ones in the muscles of these birds, and because they are thin, quail meat is more delicate compared to other poultry species. In addition, it is dietetic and recommended for convalescents. Rich in protein, it has little water and fat, and at the same time does not contain cholesterol. It provides potassium and copper necessary for the proper functioning of the nervous system, phosphorus which is beneficial for bones and teeth, and zinc ensuring good skin and hair condition.
- **VEAL** – easily digestible, soft, tender meat and minimal intramuscular fat. It is overgrown with very delicate connective tissue, which is a source of collagen – affecting e.g. the elasticity of skin and joints. The unique properties of this meat result largely from the way in which the calves are fed – mainly with milk. Veal is recommended in dietary nutrition. It contains a lot of protein and little fat at the same time. It is rich in the B-group vitamins, first of all: vitamin B1 – essential for maintaining health of both the nervous and the cardiovascular system; B12 – participating in the formation and regeneration of red blood cells; iron preventing anemia; and phosphorus maintaining the skeletal system in good shape.
- **DEER** – the qualities of deer meat result from the healthy lifestyle of these animals: from maintaining a natural diet based on fresh leaves, grasses and herbs, as well as intensive, everyday physical activity. It is therefore low in fat and high in protein. Deer meat is also recommended for allergy sufferers. Game is a rich source of

unsaturated fatty acids – it contains a lot of n-3 acids, which provide immunity and help prevent cancer, among other things. Vitamins B3 (niacin) and B12 contained in deer meat support e.g. the nervous system. Zinc keeps the skin and fur in a good condition, also contributing to the proper functioning of the immune system.

■ **DUCK** – a nutritious, rich in protein, noble poultry species. Although highly calorific, duck meat is rich in healthy fats and has a favorable profile of essential fatty acids. Moreover, it provides a high dose of iron which protects against anemia, selenium that is an antioxidant and prevents cancer changes and zinc which ensures proper functioning of skin, as well as B-group vitamins affecting the entire body.

■ **GOOSE** – the most calorific among all poultry meats, characterized by high unsaturated fatty acid content, rarely found in bird meat, beneficial for the health of the cardiovascular system and efficient functioning of the nervous system. Rich in vitamins A, E and B. These are picky birds – they are fed with green food and oats. Such a diet influences the taste, nutritional and health-promoting qualities of their meat. Goose meat is recommended especially in case of weakness of an organism or in a diet of physically active dogs.

■ **LAMB** – lean meat with delicate fibers. Thanks to its intramuscular fat content, which does not dissolve as a result of heat treatment, it is extremely juicy. Its advantages result from the way in which lambs are fed – mainly with milk, green fodder and grass. Lamb meat provides high quality hypoallergenic protein – therefore it is recommended especially for dogs prone to food allergies. It also contains B vitamins, micro and macroelements necessary for proper functioning of the body, as well as polyunsaturated fatty acids n-6 and n-3 in favorable proportions. It is also a source of L-carnitine, which increases body's efficiency and orotic acid, which has an anti-cancer effect.

■ **KANGAROO** – these animals live exclusively in their natural environment, feeding on leaves, grasses, flowers, ferns and mosses. Their meat is free of antibiotics and hormones. For these reasons, it is considered to be one of the healthiest in the world and works well in the diet of allergy sufferers. Since kangaroos do not produce methane (a greenhouse gas) at all, they do not have a negative impact on the ecosystem. Their red meat is extremely lean – it contains approximately the same amount of fat as chicken, providing mainly unsaturated fats needed in the body, and at the same time plenty of highly digestible protein, being extremely rich in iron and zinc, beneficial for the cardiovascular system, fatty acids DHA and EPA and vitamins, including vitamin B12, which supports the nervous system.

■ **BEEF** – red meat that is particularly well suited to the needs of active dogs. It contains creatine, which increases exercise capacity and L-carnitine, which boosts metabolism and enhances recovery after each activity. Besides, beef meat also includes linoleic acid (CLA), which burns fat and has a positive effect on the muscles condition. It also provides alanine, an amino acid that protects muscles from damage when a body is not supplied with sufficient amount of carbohydrates, preventing muscle mass loss at the same time. It is a source of perfectly assimilable iron – ensuring proper blood balance, phosphorus – maintaining bone and teeth health, zinc – affecting the condition of the skin and selenium – protecting against oxidative stress, as well as vitamins from group B, A and E.

■ **ROE DEER** – wild roe deer eat wild plants, leaves, grass, forest fruit and spend their entire lives on the move. Thanks to a healthy diet and an active lifestyle, their meat is lean and rich in blood. It has an exceptionally favorable protein and fat ratio, and is rich in unsaturated fatty acids and iron, which are the building blocks of the hemoglobin that supplies the body with oxygen. These nutrients have a positive effect on the immune system and an anti-cancer effect. This meat, it is well tolerated by allergy sufferers. Vitamins B3 (niacin) and B12 contained in deer meat support e.g. the nervous system. Zinc keeps the skin and fur in a good condition, also contributing to the proper functioning of the immune system.

### A complete pet food for adult dogs of all breeds – kangaroo and beef

pouch 300 g, can 400 g, 800 g

**Composition:** kangaroo 40% (meat), beef 40% (meat 10%, lungs, liver, hearts, tripes), broth, chick peas 2%, mango 1.5%, minerals, avocado 1%, orange 0.5%, dried brewer's yeast 0.3% (containing prebiotics: mannan-oligosaccharides and-glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D3 – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

### A complete pet food for adult dogs of all breeds – beef and goose hearts

pouch 300 g, can 400 g, 800 g

**Composition:** beef 40% (meat 14%, lungs, liver, hearts, tripes), goose 40% (hearts 26%, meat 10%, gizzards), broth, blueberry 2%, avocado 1.5%, minerals, carrot 1%, pear 0.5%, dried brewer's yeast 0.3% (containing prebiotics: mannan-oligosaccharides and-glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D3 – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

**A complete pet food for adult dogs of all breeds  
– deer and duck**

*pouch 300 g, can 400 g, 800 g*

**Composition:** deer 40% (meat), duck 40% (meat 10%, liver, hearts, gizzards), broth, cranberry 3%, minerals, sweet potato 1%, peas 0.5%, pear 0.5%, dried brewer's yeast 0.3% (containing the prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

**A complete pet food for adult dogs of all breeds  
– veal and lamb**

*pouch 300 g, can 400 g, 800 g*

**Composition:** veal 45% (meat 30%, lungs, liver, hearts, tripes), lamb 35% (meat 20%, liver, stomachs, lungs), broth, peas 2%, banana 1.5%, minerals, pear 1%, carrot 0.5%, dried brewer's yeast 0.3% (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

### A complete pet food for adult dogs of all breeds – roe deer and beef

*pouch 300 g, can 400 g, 800 g*

**Composition:** roe deer 40% (meat), beef 40% (meat 10%, lungs, liver, hearts, tripe), broth, blueberry 2%, cranberry 1.5%, minerals, banana 1%, apple 0.5%, dried brewer's yeast 0.3% (containing prebiotics: mannan-oligosaccharides and-glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

### A complete pet food for adult dogs of all breeds – duck and quail

*pouch 300 g, can 400 g, 800 g*

**Composition:** duck 54% (meat 24%, liver, hearts, gizzards), quail 26% (whole), broth, banana 2%, pumpkin 2%, minerals, spinach 0.5%, pear 0.5%, dried brewer's yeast 0.3% (containing prebiotics: mannan-oligosaccharides and-glucans), linseed 0.1%, Plantago seed, Mojave yucca, seaweed, New Zealand green-lipped mussel 0.02%, glucosamine 0.02%, chondroitin sulphate 0.02%.

**Analytical constituents:** crude protein – 11%, crude fat – 7.5%, crude ash – 2%, crude fibre – 0.8%, moisture – 76%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Zinc (zinc oxide, zinc chelate of amino acids, hydrate) – 49.5 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, Selenium (selenised yeast *Saccharomyces cerevisiae* CNCM I-3060, inactivated) – 0.01 mg.

## PREMIUM ENERGY

### Why choose Dolina Noteci PREMIUM Energy?

- The composition of this pet food is carefully adapted to the requirements of adult active and working dogs. It provides a dog with a complete meal which is easily digestible and rich in complete protein.
- Linseed oil and salmon fat, sources of 3 and n-6 fatty acids, vitamin E and a number of biologically active compounds ensure proper appearance of the coat and improve the functioning of the digestive tract.
- The other advantage of this food are valuable additives such as: yeast, beta glucans and mannanoligosaccharides, methylsulfonylmethane and Mojave yucca which regulate the functioning of digestive tract, neutralize the unpleasant odour of faeces and simulate the growth of beneficial intestinal microflora.
- Observing the recommended food dosage is a guarantee of proper nourishment of highly-active dogs without the risk of nutrients deficiency.

### A complete pet food for active and working adult dogs of all breeds

can 400 g, 800 g

**Composition:** beef 30% (lungs, hearts, tripes, meat, udders), pork 20% (meat, liver, kidneys, gullets), turkey 15% (meat, heart, gizzards, skin), broth, chicken 5% (liver), eggs 5%, natural brown rice 2.5%, salmon oil 1.3%, minerals, dried brewer's yeast (containing prebiotics: mannan-oligosaccharides and  $\beta$ -glucans), Plantago seed 0.3%, linseed oil 0.2%, MSM (dimethyl sulfone) 0.05%, Mojave yucca 0.03%.

**Analytical constituents:** protein – 13.5%, crude oils and fats – 10%, crude ash – 2%, crude fibre – 1.5%, moisture – 72%, calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E (DL-alpha-tocopheryl acetate) – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese oxide) – 2 mg, Copper (copper sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg.

**Energy value:** 136 kcal/100 g.

# Dolina Noteci®

## PREMIUM LIGHT

### Why choose Dolina Noteci PREMIUM Light?

- The composition of this pet food, developed in accordance with the latest standards and nutritional recommendations, is carefully adapted to the requirements of adult dogs with reduced level of activity and tendency to overweight and obesity.
- Valuable additives, such as yeast, beta glucans, mannan-oligosaccharides, methylsulfonylmethane, carrots and Mojave yucca, guarantee correct digestive processes, regulate defecation, neutralize unpleasant odour of faeces and also help keep the inflammatory reaction of the organism at a suitable level.
- The dietary prophylaxis effect of the food and the correct nourishment of the organism will be achieved only when the recommended food dosage is applied.

### A complete pet food for adult, less active dogs with a tendency to gain weight

can 400 g

**Composition:** pork 35% (meat, lungs, hearts, liver), chicken 13% (gizzards, liver), carrot 4%, minerals, dried brewer's yeast 0.45% (containing the prebiotics:  $\beta$ -glucans and mannano-oligosaccharides), salmon oil 0.3%, Plantago seeds 0.3%, MSM (dimethyl sulfone) 0,05%, yucca Mojave 0,03%.

**Analytical constituents:** protein – 10%, crude oils and fats – 3%, crude ash – 2%, crude fibre – 4%, moisture – 80%, calcium – 0.2%, phosphorus – 0.15%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E (DL-alpha-tocopheryl acetate) – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese oxide) – 2 mg, Copper (copper sulfate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, L-carnitine – 800 mg.

**Energy content:** 64 kcal/100 g.

**Dolina<sup>®</sup>  
Noteci**  
PREMIUM

PERFECT  
CARE

### Why choose Dolina Noteci PREMIUM Perfect Care?

- The best raw materials have been carefully selected to produce this pet food. The high quality of biologically active ingredients used guarantees personalized nutritional management for each of the selected conditions requiring nutritional intervention.
- **RECOVERY** – through appropriate concentration of calories and selected nutrients, it supports the body during convalescence, after surgeries or when there is a lack of appetite.
- **JOINT MOBILITY** – glucosamine and chondroitin sulfate provide beneficial effects on joints and joint cartilage.
- **WEIGHT REDUCTION** – reduced caloric content and fat level help maintain dogs' correct body mass. Dedicated to not very active pets with a tendency to put on weight.
- **ALLERGY** – the formula is based on a single source of proteins and meets the requirements of sensitive dogs prone to allergies.
- **INTESTINAL** – the prebiotics: mannanoligosaccharides and beta-glucans support the protective intestinal barrier and immune processes by promoting the development of beneficial intestinal microflora.
- **SKIN SUPPORT** – Omega-3 and Omega-6 fatty acids have a positive effect on skin function and coat condition.

### A complete pet food Dolina Noteci PREMIUM Perfect Care RECOVERY

can 185 g, 400 g

**Composition:** pork 50% (hearts, liver, meat, lungs), broth, chicken 15% (liver, hearts, gizzards), eggs 6%, linseed oil 3%, brown rice 2.5%, minerals, salmon oil 0.5%, dried brewer's yeast 0.5% (containing the prebiotics:  $\beta$ -glucans and mannanooligosaccharides), psyllium seeds 0.3%, yucca Mojave 0.02%.

**Analytical constituents:** crude protein – 12%, crude fat – 8%, crude ash – 2.2%, crude fibre – 1%, moisture – 75%, calcium – 0.3%, phosphorus – 0.25%, Omega-3 fatty acids – 1%, Omega-6 fatty acids – 1.5%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin E – 40 mg, Vitamin C – 2000 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (copper (II) sulphate, pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous) – 0.3 mg, L-carnitine – 800 mg, Taurine – 500 mg.

**Energy value:** 115 kcal / 100 g.

## PREMIUM SENIOR

### Why choose Dolina Noteci PREMIUM Senior?

- This pet food has been developed according to the latest standards and nutritional recommendations. Consequently, it is perfectly adapted to the requirements of aging and old dogs. While developing the composition, the results of scientific observations as regards the influence of biologically active compounds on aging organisms, have have been taken into account.
- It is the source of high-quality protein rich in amino acids such as lysine, leucine, phenylalanine and tryptophan. Addition of chicken eggs influences the content of other exogenous amino acids and provides the dog with valuable fatty acids. The amount of protein in the food is adapted to the requirements of older dogs.
- It contains fatty acids in proportions ensuring correct metabolic processes. The source of fats and unsaturated fatty acids are meat and animal derivatives, as well as vegetable oils of high biological quality. Salmon fat, a source of n-3 fatty acids and a number of biologically active substances with anti-inflammatory properties (EPA and DHA acids), controls the inflammation processes, improves the skin function and appearance of the coat.
- Addition of yeast, beta glucans and mannanoligosaccharides ensures correct digestive processes and stimulates the growth of beneficial intestinal microflora.
- Due to its significant anti-inflammatory and antioxidant properties, methylsulfonylmethane helps keep the inflammatory reaction on a suitable level and has a protective impact on the cell ingredients which may be damaged as the organism gets older.
- Thyme, basil and rosemary provide a dog with an additional portion of biologically active compounds with a wide spectrum of biological action and improve the flavour properties of the food.
- Carrots and potatoes, on the other hand, provide necessary energy for metabolic processes and - as sources of i.a. dietary fibre - ensure proper digestive processes and regulate defecation.
- Observing recommended food dosage is a guarantee of correct nourishment without the risk of overweight or obesity.

### A complete pet food for older dogs of all breeds rich in veal with carrot and thyme

can 400 g

**Composition:** : veal 22% (liver, lungs, meat, tripes), chicken 20% (hearts, meat, liver), pork 18% (kidneys, liver, gullets), broth, carrot 5%, potatoes 5%, eggs 4%, minerals, salmon oil 1%, cellulose powder (fiber), dried brewer's yeast 0.4% (containing: MOS and beta-glucans), Plantago seed 0.3%, MSM (methyl sulphonyl methane) 0.08%, Mojave yucca 0.02%, dried thyme 0.02%.

**Analytical constituents:** crude protein – 8%, crude fat – 4.5%, crude ash – 2.3%, crude fibre – 1%, moisture – 81% , calcium – 0.3%, phosphorus – 0.25%.

**Additives: nutritional additives/kg:** Vitamin D<sub>3</sub> – 450 IU, Vitamin C – 1000 mg, Vitamin E – 40 mg, Zinc (zinc oxide) – 30 mg, Manganese (manganese (II) oxide) – 2 mg, Copper (cupric sulphate (II), pentahydrate) – 0.4 mg, Iodine (coated, granulated calcium iodate, anhydrous ) – 0.3 mg.
