

Dolina Noteci SUPERFOOD Paté & Fillet is a range of complete cat foods developed to meet cats' natural nutritional needs and refined taste preferences. Made with carefully selected animal-derived ingredients, these recipes provide high-quality protein and essential fatty acids to support the overall health of adult cats. Each recipe stands out for its high content of meat and other animal-derived ingredients, including muscle meat, which contributes to its high nutritional value. Unique flavour combinations, enriched with functional ingredients such as herbs, fruits and superfoods, not only enhance palatability but also help support the cat's immune system, digestion and overall condition. A distinctive feature of the range is its Paté & Fillet texture, which combines tender fillets with smooth paté. This appealing consistency delivers an exceptional taste experience while also supporting nutrient absorption. Depending on the variant, the recipes are tailored to the needs of adult cats and neutered cats, including support for metabolism and the maintenance of a healthy body weight. Dolina Noteci SUPERFOOD Paté & Fillet is more than just food – it is a daily serving of thoughtfully balanced nutrition, combining quality, functionality and flavour in line with cats' natural preferences.

Pet food available in cans 185 g and pouches 100 g

## SUPERFOOD

Pet food available in pouches 85 g

Dolina Noteci Superfood wet cat food is an innovative line which fully covers the demand for all nutrients, minerals and vitamins. Its formula is based on high quality meats, fish and crustaceans, taking into account specific nutritional requirements of adult cats - carnivores. Daily and long-lasting use of Dolina Noteci Superfood series provides ingredients which have been scientifically proven to have a dietoprophylactic effect on your pet's body. There is a reason why this line of cat foods is called Superfood, as it contains valuable functional additives such as: blue mussel, spirulina, peppermint, fenugreek seeds and flaxseed which have beneficial influence on the entire organism, mainly on the proper functioning of the digestive system, skin and hair coat as well as joints.
